

Environment

Do you?

- **Enjoy problem solving**
- **Have a critical and enquiring mind**
- **Have an interest in conservation**

Then a role in the Environmental sector of the water industry could be for you!

There are opportunities in all areas of the Queensland Water Industry for those that want to work in the environmental sector, especially if you are interested in working in a regional location.

Environmental roles in the water industry are essential to better management of water resources and the improvement of water quality. Roles also deal with identifying and managing new or existing impacts upon the environment.

Roles span across a variety of activities in the Queensland Water Industry. These include environmental scientists, ecologists, natural resource and catchment managers.

Benefits of working in the water industry include the chance to do something worthwhile for your community, working on a wide range of interesting projects, a flexible workplace that supports your work/life balance and the opportunity to be part of a secure workforce where you can find jobs anywhere in the world!
