

Careers in Water - Factsheet no. 6

Engineering

Do you?

- Have strong problem solving skills
- Enjoy finding out how things work
- Like working with computers

Then a role in Engineering in the water industry could be for you!

There are lots of opportunities in the Queensland Water Industry for Engineers, especially if you are interested in working in a regional location.

You could work in planning, designing, building or analysing the hardware for collecting, storing, purifying, delivering and managing water.

There are a variety of Engineering fields employed in the Water industry like Chemical Engineering, Civil Engineering or Environmental Engineering.

You might work in a Water Treatment Plant one month and in the Engineering Design office the next, there are heaps of opportunities.

Benefits of working in the water industry include the chance to do something worthwhile for your community, working on a wide range of interesting projects, a flexible workplace that supports your work/life balance and the opportunity to be part of a secure workforce where you can find jobs anywhere in the world!
